

3 June 2025

## CYBER SAFETY

Dear Parents and Carers,

In today's digital world, our children are growing up surrounded by technology and devices. While the internet offers many educational and social benefits, it also brings challenges. At Calvary, we are committed to partnering with parents as we help our students develop safe and responsible online habits.

In 2025, Junior School students will participate in the presentations outlined below.

### ThinkUKnow

The ThinkUKnow student presentations are tailored to educate students on the safety issues each stage might face online. Presentations focus on how students can make informed decisions to keep themselves safe online and overcome challenges through help seeking behaviour. ThinkUKnow student presentations are linked to the Australian Curriculum to ensure they are age-appropriate and relevant to students' learning.

These presentations will be delivered by our local school-based police officers on **Tuesday 10 June at Springwood** and **Thursday 12 June at Carbrook** for all students from **Prep – Stage 3**.

If you would like more information about these programs, please visit [www.thinkuknow.org.au/about](http://www.thinkuknow.org.au/about)

### Safe on Social

The Safe on Social presenters have recorded a student and parent session specifically designed around the questions our parent community are asking about technology usage. These include:

- ways of managing technology to maintain privacy,
- settings to avoid divulging personal data and an understanding of digital footprints,
- how to report inappropriate online behaviour,
- developing a set of 'rules' about appropriate conduct, language and content when communicating online.

These sessions will be delivered to **Stage 2 & 3** students **across Term 3**. If you have any questions about the content of this program, please visit: [www.safeonsocial.com](http://www.safeonsocial.com). This learning will be consolidated with selected sessions from Safe on Social's E-Ready Kids program. This program empowers young learners with essential digital literacy and online safety skills. Designed to nurture critical thinking, responsible technology use, and positive digital citizenship, the modules blend interactive learning with real-world applications.

A link to the Parent presentations will be shared closer to the student sessions.

### Qustodio

Qustodio's parental control tools help parents to keep their kids' screen time safe and balanced on every device. Parents are encouraged to sign up for the Qustodio app using their email addresses registered with the College. In doing so, parents will be able to better control and guide their children's screen time on the College laptop and a personal device per student registered at the College.

- 🔗 Sign up now for an account using following link: [Qustodio Registrations](#)
- 🔗 Access installation guides by following this link: [Help Guides](#)

If you would like further information about these programs, please email [Carlee.johnston@calvarycc.qld.edu.au](mailto:Carlee.johnston@calvarycc.qld.edu.au).

Kind regards,

**Carlee Johnston**
